Knee RX: Prescription For Knee Comfort From NoTrax®

“Specifically Designed For Comfort And Durability In Extreme Kneeling Applications”

Chicago, Illinois – Superior Manufacturing Group (SMG), Introduces the Knee RX Kneeling Mat, developed with the welfare and comfort of your employees in mind. Knee RX provides ergonomic support for those who are required to occasionally kneel while working by reducing trauma, stress and strain on the knees and lower back.

Perfect for tool and maintenance carts, or for individual workstations, Knee RX is intended for use on indoor surfaces such as tile and wood flooring, concrete, and metal grating, or for outdoor applications on gravel, asphalt, and grass. Made from a nitrile/PVC foam blend for the highest degree of resistance to oils and greases, Knee RX also provides comfort and keeps you clean while working on dirty, oily surfaces.

A full 1 inch thick for the ultimate in comfort, Knee RX is available in a standard foam version, and a heavy-duty version with a NoTrax® exclusive, laminated rubber bottom surface for additional comfort and long-lasting wear in the roughest environments.

Knee RX eliminates the hassle and discomfort of wearing knee pads, and a built in handle makes it easy to carry or hang up. Knee RX is non-conductive, and made from a self extinguishing, silicone free material.

Superior Manufacturing Group is headquartered in Chicago, Illinois with additional manufacturing and distribution facilities in Georgia, Mississippi, and The Netherlands. For over 50 years, Superior has been dedicated to serving the needs of the floor matting industry with quality products, customer service, and sales support. Superior's NoTrax® family of floor matting products can be found in a wide variety of applications for the industrial and commercial markets.
